this 18 volume set constitutes the refereed proceedings of the 8th chinese conference on pattern recognition and computer vision prcv 2025 held in shanghai china during october 15 18 2025 the 692 full papers included in this book comprising 66 oral presentations and 626 posters were carefully reviewed and selected from 2370 submissions prcv s mission is to serve as a comprehensive platform for dialogues among researchers from both the academic field and the industry while its primary focus is to encourage academic exchange it also places emphasis on fostering ties between academia and industry keeping abreast of leading academic innovations and to showcase the most recent research breakthroughs pioneering thoughts and advanced techniques in pattern recognition and computer vision

this book focuses on the theme advances in mechanical system dynamics research driving industrial development this book features twenty topic areas that foster research in dynamic modeling of complex structures multidisciplinary integration and advanced industrial applications this book brings together over ten renowned experts for plenary speeches and more than twenty sessions of oral and poster presentations creating an invaluable platform for academic exchange and collaboration at the forefront of mechanical system dynamics

provenance research in the art trade it does exist that much is known but what is taking place in essence what is or was subject of research by whom for what purpose and what are the results to date only a few insiders have had the opportunity to obtain answers to these questions this is largely because research results from the art trade are only published to a very limited extent they are mentioned in the catalog with just a few lines the efforts behind the in depth research are hard to recognize for outsiders this is the first publication of an inside view from the provenance research department at a major

german auction house with the aim of making research into previously unknown jewish collections and dealers accessible to an academic community at the same time this publication also wants to demonstrate how provenance research is or can be carried out in the auction trade renowned guest authors from research institutions museums the international restitution system private archives and the art trade provide a framework and superstructure for the specific case studies the articles address the often uneasy relationship between the art trade and the academic world however they also illustrate the opportunities that a close exchange in the field of provenance research can and should offer thus 25 years after the adoption of the washington principles which provided guidelines for public handling of nazi plunder but by no means for the private and commercial sector this publication is also an appeal for transparency for cooperation and for a common goal the original german version of this book was published in 2023 under the title provenienz forschung und kunsthandel to mark the 25th anniversary of the washington principles

economics requires understanding and analyzing forces that bring buyers and sellers to a market place who then negotiate exchanges of goods and services based on a mutually agreeable price economists have their own method of modeling

whereby models are first conceived of some notion of economic and financial thinking before being empirically tested and anomalies are then recognized if the observed data is inconsistent with the hypothetical underpinning this is in inherent contradiction with the modeling approaches of physicists who develop their theories principle and laws after observing empirical data the awareness that physics can enlighten the understanding of human behavior and thus economics and the interest of physicists in applying their training and models to understanding the complexities of finance and economics led to the creation of a new field of study appropriately termed as econophysics selected topics on econophysics is a collection of essays on topics that enhance and enrich our understanding of economic modeling when the same rigor of modelling used by physicists is brought to developing financial and economic theories these articles include discussions on modeling bitcoins stock index modeling using geometric brownian motion agent based modeling wealth distribution modeling as well as modeling related to fractal regression and chaotic processes this interdisciplinary book will interest researchers graduate students and professionals in the fields of economics finance as well as physics

a doody s core title for 2023 the 1 annual internal medicine guide extensively revised and updated the most popular annual guide of its kind this updated edition of the flagship title of the lange medical book brand presents the most important diagnostic and treatment recommendations as well as the most useful new clinical developments in every field of adult medicine for 60 years current medical diagnosis treatment has been delivering the authoritative information that students residents and clinicians need to build their medical knowledge expertise and confidence written by top experts in their fields this unmatched guide enables you to find the answers you need quickly and easily it provides coverage of more than 1 000 diseases and disorders comprehensive approach to patient care focusing on diagnostic tools for day to day practice hundreds of drug treatment tables for quick access to indexed trade names and updated drug prices diagnostic and treatment algorithms to present important information at a glance carefully curated updated references to provide peer reviewed evidence based information and pmid numbers for quick online access annual update on dynamic viral infections including sars cov 2 covid 19 and hiv aids hundreds of full color photographs illustrations and algorithms

innervation plays a pivotal role in the development and functional control of tissues and organs with the vagus nerve serving as a critical conduit for brain body communication this nerve s ability to innervate peripheral organs and directly connect them to the brain underscores its potential as a therapeutic tool for a wide range of central and peripheral diseases historically electrical vagus nerve stimulation vns has been a subject of research since the 19th century gaining significant recognition in the 1990s with fda approval for treating refractory central nervous system disorders such as epilepsy and depression recent advancements have highlighted the vagus nerve s global anti inflammatory properties and the development of non invasive vns devices which offer similar efficacy to invasive methods but with improved safety profiles despite these advancements there remain gaps in our understanding of the full potential and applications of non invasive vns necessitating further investigation into its broader clinical applications and mechanisms this research topic aims to highlight the latest trends and applications of non invasive vagus nerve stimulation promoting new clinical strategies for these innovative non pharmaceutical therapeutics specifically the research seeks to explore new indications for non invasive vns innovations in stimulation modalities and applications for diverse patient populations additionally the research will investigate the development of new types of treatments such as preventive curative and regenerative therapies and explore the timing of stimulation including nocturnal versus diurnal and permanent versus triggered stimulation to gather further insights into the boundaries of non invasive vagus nerve stimulation we welcome articles addressing but not limited to the following themes new indications for non invasive vns innovations in stimulation modalities including music ultrasound stimulation closed loop treatment and multi modal neuromodulation applications for new patient populations including fetuses pregnant women infants the elderly and underserved low income populations development of new types of treatments preventive curative and regenerative therapies exploring new timing of stimulation such as nocturnal versus diurnal stimulation and permanent versus triggered induced stimulation by focusing on these research insights and clinical applications we aim to further the understanding and impact of vagus nerve stimulation in the field of neuroscience and beyond professor peter staats is co founder and cmo for electrocore tm co founder of alliance of interventional pain physicians and he is also a consultant for ais therapeutics medtronic and biotronic he holds several patents related to stimulating vagal nerve the other editors declare no potential conflict of interests

the pharmaceutical industry an important segment of the chemical industry is technologically prolific not only has it been historically successful in providing valuable new drugs but its research and development laboratories have also made significant contributions to our understanding of disease mainly because of the success of the industry people today can look forward to longer and healthier lives than ever before pharmaceuticals classes therapeutic agents and areas of application provides an authoritative coverage of the subject area important pharmaceuticals and disease symptoms to be treated are discussed along with a survey of the industry regulatory aspects and the procedure to be followed from the discovery of a new pharmacologically active agent to its marketing as a drug internationally respected authors from both industry and academia in many of the world's major industrialized countries provide a complete picture top quality illustrations clear diagrams and charts and the extensive use of tables enhance presentation and provide a unique level of detail plus a keyword author and a cas registry number index round off the contents of this handbook this work will be an invaluable source of information for pharmaceutical chemists medicinal chemists chemical engineers patent attorneys marketing specialists and all those involved in today's pharmaceutical industry

this research topic is the third volume of research topic culture and emotion in educational dynamics please see the second volume here culture plays a significant role in regulating emotions and influencing the dissemination of education particularly within diverse geographic locations however the impact of culture on emotional dynamics within educational settings is not well understood this is particularly important within contexts of social and cultural diversity where schools must navigate cultural and majority emotional dynamics the aim of this research topic is to provide a comprehensive overview of the current state of the art in the field of emotional dynamics in education with a particular focus on the ways in which culture mediates these dynamics the topic will also explore the problems and solutions deployed within educational contexts of cultural diversity with a specific emphasis on school family and community interaction this research topic seeks to integrate experiences and contributions from diverse regions of the world to provide a comprehensive understanding of the role of culture in regulating emotions in educational dynamics the ultimate goal is to promote culturally responsive practices and

policies that foster emotional well being and academic success for all learners this article collection welcomes submissions of empirical investigations conceptual theoretical original works systematic reviews and policy briefs that address emotional dynamics within diverse cultural contexts of non formal formal and informal education specific topics of interest with a focus on culture education and emotion that we will cover in this research include but are not limited to minorities disabilities migrant and non migrant populations educational centers at all levels preschool primary secondary and university art language education including language classes in schools curriculum design collective rituals sexual and affective education environment sports applied neuroscience please note an abstract must be submitted prior to any manuscript with topic editors expecting an abstract of around 350 words
