asynchronous transfer mode atm networks are widely considered to be the new generation of high speed communication systems both for broadband public information highways and for local and wide area private networks atm is designed to integrate existing and future voice audio image and data

services moreover atm aims to simplify the complexity of switching and buffer management to optimise intermediate node processing and buffering and to limit transmission delays however to support such diverse services on one integrated communication network it is most essential through careful engineering to achieve a fruitful balance amongst the conflicting requirements of different quality of service constraints ensuring that one service does not have adverse implications on another over recent years there has been a great deal of progress in research and development of atm technology but there are still many interesting and important problems to be resolved such as traffic characterisation and control routing and optimisation atm switching techniques and the provision of quality of service this book presents thirty two research papers both from industry and academia reflecting latest original achievements in the theory and practice of performance modelling of atm networks worldwide these papers were selected subject to peer review from those submitted as extended and revised versions out of fifty nine shorter papers presented at the second ifip workshop on performance modelling and evaluation of atm networks july 4 7 1994 bradford university at least three referees from the scientific committee and externally were involved in the selection of each paper

the european photovoltaic solar energy conferences are dedicated to accelerating the impetus towards sustainable development of global pv markets the 16th in the series held in glasgow uk brought together more than 1500 delegates from 72 countries and provided an important and vital forum for information exchange in the field the conference proceedings place on record a new phase of market development and scientific endeavour in the pv industry representing current and innovative thinking in all aspects of the science technology markets and business of photovoltaics in three volumes the proceedings present some 790 papers selected for presentation by the scientific review committee of the 16th european photovoltaic solar energy conference the comprehensive range of topics covered comprise fundamentals novel devices and new materials thin film cells and technologies space cells and systems crystalline silicon solar cells and technologies pv integration in buildings pv modules and components of pv systems implementation strategies national programs and financing schemes market deployment in developing countries these proceedings are an essential reference for all involved in the global pv industry scientists researchers technologists and those with an interest in global market trends the conference was organised
